

EXOSKELETON TECHNOLOGY FOR EXTRAORDINARY LIVES

Duchenne UK is a non-profit organisation developing the award winning Elevex: the first ever soft exoskeleton arm-assist. An iconic product, supporting people with Duchenne muscular dystrophy (DMD) and Spinal muscular atrophy (SMA) to live more fulfilling lives. These are some of the most determined people on the planet and are at the heart of every decision we make.

We've raised £2 million and powered two stages of prototyping. The DMD and SMA communities are actively engaged in every stage of testing to develop better assistive solutions. Our work will help everyone living with mobility conditions to make the most of life, from the everyday, to their greatest triumphs.

Elevex is designed to help everyone have the freedom and confidence to move through life and embrace whatever comes their way.

We're seeking companies and individuals to help us raise £2 million to fund the final stages of research and development (R&D) and pre-launch preparations. With your support we will bring Elevex to market by 2026. Please join us, and be a part of a life-changing global technology revolution.

“My son has a limiting disease and is physically disabled - he can't walk and has limited arm movement. Every day, he faces countless challenges navigating a world built for the able-bodied. Even mundane tasks require a level of resourcefulness and resilience many people will rarely

practice in their lives. It's time to stop pretending that the uncomfortable, indiscrete, and genuinely ugly equipment foisted upon people like my son actually caters to their needs. It's time to kickstart a movement committed to building life-improving products everyone loves, designed for the disabled community, by the disabled community and its allies. Elevex is the answer!”

Emily Reuben OBE, mother to Eli, who lives with DMD.

DETERMINED CHANGE MAKERS

Real change happens when great people come together to share their skills and expertise for a common goal. We've brought together leaders in the fields of exoskeleton technology, assistive technology, inclusivity, engineering and patient insight that sets our organisation and product apart from the competition. We know that by working together, Elevex will change the lives globally and drive a systematic shift across the assistive products industry.

This is your opportunity to be a part of it.

THE ELEVEX PROJECT TEAM:

Emily Reuben OBE, Chief Executive and Co-Founder, Duchenne UK

Emily's unique perspective combines professional and personal experience to inform the development of a 'best in class' product.

Under Emily's leadership, Duchenne UK has become the UK's leading DMD charity and changed the landscape for DMD research, treatment and care globally.

Hayley Philippault, Head of Technology

18 years' experience of product design, development and commercialisation of assistive technology in the charity and private sectors.

David Buckley, Technology Project Manager

15 years' design engineering experience. Highly skilled in bringing customer solutions to life and driving forward efficient revenue growth by aligning marketing and sales strategies.

OUR STRATEGIC PARTNERS:

World leaders in inclusive and human-centred design.

The UK's leading SMA charity, contributing deep insight and access to SMA patient insight.

Experts in accelerating new growth ideas from concept to commercial success.

JOIN THE TECHNOLOGY REVOLUTION

This is a rare opportunity to invest in innovation that is making real change. You will see the impact of your investment within 24 months. We are seeking amazing people, companies and grant making bodies to help us raise £2 million to fund the final stages of Elevex's development and enable market entry by 2026.

Funding will power the incremental development of complex technical solutions by Duchenne UK and our strategic partners, making the best use of our specialist knowledge and feedback from the DMD and SMA communities, resulting in a product that cannot fail - because it's been shaped by the extraordinary people who will use it everyday.

To discuss funding and partnership opportunities or learn more about Elevex, please contact emily@duchenneuk.org
